**Re: Lining of a 100 mm sewer at 6 Canberra Crescent East Lindfield**

Dear Mark,

Just a short note to thank you for the immaculate job you did on our property last week. You not only explained what had to be done in a very clear and concise way but you and your assistant carried out the tree roots removal and subsequent lining and repair of our sewer line in a very professional and efficient manner.

Thanks for the receipt you sent in the mail plus thanks also for the fantastic DVD with film footage of the job you and your assistant so expertly completed. I have two doctors in this home (wife and daughter) who were very impressed by what you were doing and they compared this technology to the similar heart surgery techniques that so many Australians have benefited from when they get blocked arteries.

After working in testing laboratories for over 30 years I appreciated the skills you used on this job and the precision of it all.

I would be pleased to recommend your services to any householder that needs these specialist services in the future.

Kind regards  
Robbie Geyer
