WIRING INSTRUCTIONS

1. Slide plastic cover onto cord.
2. Strip wire as shown in diagrams
3. Twist bare strands and insert into screw terminals. Brown to Active (A) Blue to Neutral (N) and 3 pin plug Earth (E).
4. Secure tightly.
5. Loop wires under strain relief lugs. Wires should be visible through bottom slots.
6. Ensure that the plastic cover is fully seated all around the base.
7. For 3 pin plug only - screw down plastic lock nut until cover is firmly held on the cord.
