

## **Auseco Field Studies COVID Policy**

The following measures must be followed by all teachers, students, educators, and any additional attendees to an AUSECO field study.

1. Any students, teachers or AUSECO educators experiencing flu like symptoms must not attend on the day.
2. AUSECO educators will practise safe social distancing on all field studies and will remind students to do the same, if required.
3. AUSECO educators will practice good COVID hygiene when they meet on site before handling equipment required for the day's excursion.
4. AUSECO educators will, when possible, choose outdoor areas to teach where there is ample space for students to sit away from the public. This includes keeping away from other class groups throughout the day and moving away from any areas that become crowded.

AUSECO encourages all students to wear a face mask on the bus journey to and from site. It is also advised that students bring a face mask so they have the option to wear it during the day should they choose.

**All Auseco staff are fully vaccinated.**
